

This week's issue will cover the following subjects.

- 🔧 Tester roll paper holder (instructions included with part)
- 🔧 Tester Rollers

Tester roll paper holder

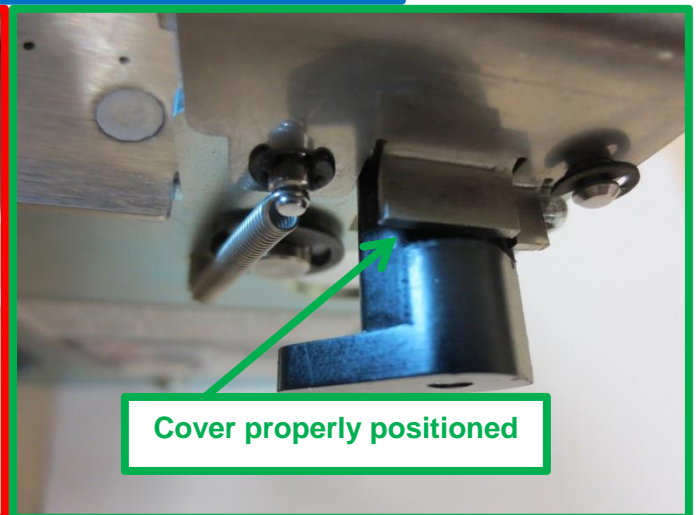

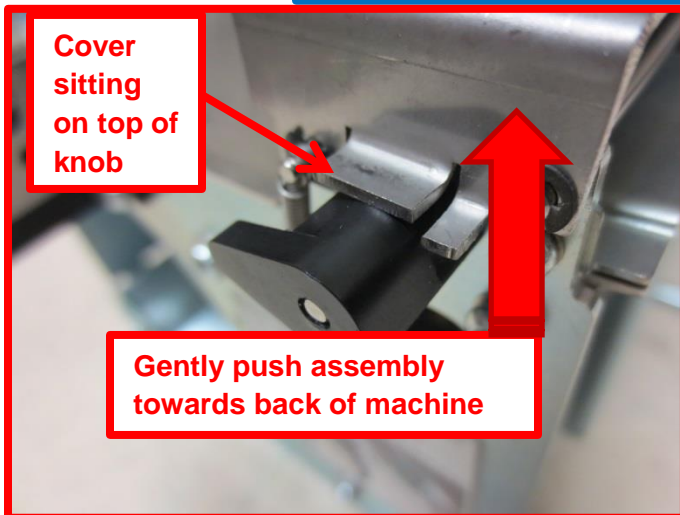

A holder for the roll paper in the tester is being installed to help prolong the life of the tester feed rollers and motor. It is held in place with a magnet and operator installable.

Tester Rollers

The cover for the feed rollers may sit on top of the knob and prevent the rollers from fully engaging and driving the paper properly. You may hear the operator report that if they push down on the assembly it will work properly. There is an easy fix for this. **Gently push the roller assembly toward the back of the machine to get it off the top of the knob.**
